

**May 5-6, 2018    10 am - 5:30 pm Each Day**

## *The Energy Practitioner Certification Workshop*

This workshop is designed for those who desire to start an energy healing practice and for those who are already working in fields such as massage therapy, Reiki, acupuncture, and holistic healing and wish to enhance their knowledge and skills. There will be focus on how to assess the chakras and explore the seven subtle bodies that create the aura, or electromagnetic field. This will be an interactive experience with teaching, learning, and sharing aspects of new and creative ways to perform an energy healing session, while maintaining a positive, secure and soothing environment for the practitioner and the clients.

You will learn how to intuit, assess, and identify imbalances of the chakras and auric fields, with an exercise designed to help see the color frequencies of the multidimensional bodies. We will also take a deeper look at energy assessment and functional integration of energy, intended for those who want to take their skills to the next level. There will be some focus on the Forsyth Crystal Light Table, and each person will conduct or participate in an energy healing session.

In this class you will learn:

- How to do a complete energy assessment
- The multidimensional bodies and how to assess imbalances
- The aura and how to attune your vision to the vibrational fields
- The properties of color and chromo therapy
- Conducting an energy balancing session
- How to clear a space and maintain a stable healing environment for yourself and clients
- Group healing

Note: Beyond the workshop, there will be 3 internship energy healing sessions required to complete the certification. You can choose not to participate in the internship part of the process if you do not wish to receive the IEL Institute certification. This is highly recommended if you are a energy practitioner.
